

END OPRESSION IN NORTH CAROLINA TOBACCO FIELDS

While big tobacco makes billions, tobacco farm workers live in poverty, face racism and harassment, nicotine poisoning, lethal pesticides, staggering debt, and have hardly any labor and human rights protections.

The tragedies which occur daily in the fields are due to industry-wide problems that need to be addressed by those who have control over the tobacco market—R.J. Reynolds being at the top of this list.

The Farm Labor Organizing Committee is calling upon R.J. Reynolds to take responsibility for the oppressive conditions in which tobacco workers labor in North Carolina. Together with FLOC, R.J. Reynolds can use its tremendous power to initiate changes that will improve the lives of growers and farm workers alike.

Farm Labor Organizing Committee

Little has changed over the last several decades for tobacco farmworkers. The fact that they still survive at subsistence level is not only a tragedy but a moral disgrace hidden from the eyes of most Americans.

I Support FLOC's struggle and efforts to meet with RJ Reynolds, and I will continue to show my support until they address the injustices farmworkers endure in their supply chain and until RJ Reynolds gives farmworkers the respect they deserve.

Susan Ivey, I urge you to reconsider your refusal to meet with FLOC!

"FLOC is called upon to challenge the deplorable conditions of the tobacco workforce that remains voiceless, powerless, and invisible to mainstream America. FLOC will campaign until R.J. Reynolds commits to joining us in addressing this national shame." "
